

2 May 1972

Hugh:

It seems to me that key points concerning the CS historical program and its relation to the overall program which might be discussed with or require clarification by the Executive Director-Comptroller, and by the DCI, are the following:

1. How will the CS be kept informed as to what CS information is going into overall Agency historical papers and those prepared by other directorates? As matters now stand the DDP does not normally review those papers outside the DDP which cover CS operations or programs, either before or after publication. This should be made a routine procedure.

2. To what extent will the DDP be consulted as to the criteria for access to such papers? Will the DDP be provided readership reports on non-CS papers which cover CS operations and programs? Again, procedures should be set up to accomplish this.

~~SECRET~~

3. The CS Historical Board, the Chief, CIA Historical Staff, and the Executive Director-Comptroller should consult on the content of the future CS historical program but final determination as to the historical papers to be written in the Clandestine Service historical program should be made by the CSHB and the Deputy Director for Plans.

4. We assume and urge that the CS continue to exercise control over operational and other sensitive^{CS} information held in the CIA Historical Staff, in Information Services, and elsewhere in the Clandestine Service.
